***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to marking plate, classified in class 40, subclass 299.01.
- II. Claim 27, drawn to a method of archiving electrical data, classified in class 29, subclass 428.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as attaching a plate to an electrical device or fixture, adhesively attaching a paper sheet to the plate, writing electrical information on the paper sheet in columns and rows.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Richard A. Catalina, Jr. on 1/27/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
